## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 02 June 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

***Response to Amendment***

1. Applicant's amendment of June 2, 2004 is acknowledged and entered.
2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Claim Rejections - 35 USC § 103***

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fly in view of Lorraine.

The patent to Fly discloses in an assembly system for assembling an internal combustion engine fuel injector 10 comprising:

- a hollow body 30 supporting an injection nozzle, the hollow body housing a metering valve as recited when the injector 10 is assembled;
- a support housing an electromagnetic controlling the metering valve (Column 2, lines 32-43);
- means 31 for connecting the support to the hollow body.

Fly does not disclose the connecting means being a click-on means. The patent to Lorraine teaches a fuel injector 10 which is connected to a fuel rail 16 by a click-on means 18 to removably connect the parts together. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Fly by incorporating a click-on means as taught by Lorraine in order to removably connect the support and hollow body together for maintenance and

Art Unit: 3752

replacement purposes. Regarding claim 2, the click-on means of Lorraine can be considered a leaf spring comprising at least one hook-shaped appendix (hook leg 20) which clicks onto a corresponding retaining element 32 on the fuel rail 16.

***Allowable Subject Matter***

5. Claims 3-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
